Google Assistant vs Bixby

Comparison Chart

Google Assistant	Bixby
Google Assistant is a voice-based personal assistant developed by Google primarily for its Pixel phones and smart home devices.	Bixby is an artificial intelligence (AI) system developed by Samsung Electronics to make device interaction easier.
Google Assistant is uniquely integrated with the Google Home ecosystem and is available for Android and iOS devices.	Bixby is tied to the Samsung's SmartThings hub and has integration with the Galaxy Home speaker.
Google Assistant excels at handling Internet search based queries.	Bixby is pretty good at executing voice commands that control the phone.
It uses Google Home app to control the smart home devices if you're too far away.	Phones have a dedicated Bixby button to bring up Bixby voice.
It is also supported by many non-Google smart home devices.	Bixby is limited to Samsung devices including phones and TVs.
